Cotton Varieties Planted, United States
1990 Crop

Deltapine was the leading variety of upland cotton planted in the United States for the 1989-90 season, according to the Cotton Division, Agricultural Marketing Service, USDA. Paymaster was the second most popular variety followed by Stoneville, Acala, Tamcot and Germain's.

Deltapine was the leading variety of upland cotton planted in the U.S. for the 1990-91 season. This variety accounted for 38.2 percent of the national acreage. Deltapine was the leading variety planted in Alabama, Arizona, Arkansas, Georgia, Louisiana, Mississippi, Missouri, North Carolina and Tennessee. Deltapine 50 and Acala 90 were the most popular strains, accounting for 17.1 and 11.8 percent of the U.S. acreage, respectively.

Paymaster was the second leading variety planted in 1990 and accounted for 17.8 percent of the U.S. acreage. Paymaster was the most popular variety planted in Texas and the second most favored variety planted in New Mexico and Oklahoma. The leading strains were Paymaster HS 26 and 145, accounting for 9.7 and 7.4 percent of the U.S. acreage, respectively.

Stoneville was the next most popular variety and accounted for 7.0 percent of the U.S. acreage. Stoneville was the second most popular variety planted in Alabama, Arkansas, Georgia, Louisiana, Missouri and Tennessee. Stoneville 453 and 506 were the predominant strains, accounting for 2.7 and 2.3 percent of the national acreage, respectively.

The fourth most popular variety planted in 1990 was Acala. This variety accounted for 5.8 percent of the U.S. acreage and was the leading variety planted in California and New Mexico and the second most favored in Arizona. Acala SJ-2 was the leading Acala strain, making up 4.3 percent of the national acreage.

The fifth most popular variety was Tamcot, accounting for 3.7 percent of the U.S. acreage. Tamcot was the third most favored variety planted in Texas. Tamcot SP-21 and CAB-CS were the most popular strains accounting for 0.9 and 1.7 percent of the 1990 acreage, respectively.

The sixth most prevalent variety planted was Germain's, which made up 4.3 percent of total U.S. acreage. This variety was the second most popular variety planted in California. Acala GC-510 was the leading Germain's strain and made up 3.5 percent of U. S. acreage.

Pima S-6 remained the leading strain of American Pima cotton planted in the United States for the 1990 crop. This was the seventh consecutive year Pima S-6 has been predominant and accounted for 98.7 percent of the total acreage planted this season. S-5, at 1.3 percent, made up the remainder of the 1990 American Pima acreage.

Estimates of the percentage of the various varieties of cotton planted in the United States for 1989 by counties, classing offices and states are presented in this report. The variety data are based primarily on estimates furnished by cotton ginners for the territories served by their gins.

Estimated percentage of upland cotton acreage planted to specified varieties,
United States, 1986-1990

Year	Acala	Delta- pine	Germain's	Pay- master	Stone- ville	Tamcot	Other	Total
